EXPERIENCE

ASSOCIATE TECHNICAL DESIGNER

Under Armour | Baltimore, MD | August 2021 - present

- Owned all technical responsibilities including building and reviewing tech packs related to development of Womens / Girls Project Rock since SS23 season, Womens / Girls Freedom since SS24 season, from design concept to production. Contributed ideas for construction, materials, and components to enhance functionality, aesthetic, fit and margin targets
- Conducted fit sessions on live models, including size sets and identified fit issues while independently performing fit adjustments to patterns and communicating changes needed to improve garment fit and function.
- Communicated with vendors and with POD to problem solve all issues related to garment engineering and graphic execution

ASSISTANT TECHNICAL DESIGNER (CONTRACT)

Survival Armor | Fort Myers, FL | May 2020 - January 2021

- Developed and modified flat sketches and technical specification packages for apparel manufacturing using Adobe Illustrator
- Created markers for optimal material utilization while respecting pattern and fabric quality boundaries using Gerber Accumark
- Plotted and emailed markers and patterns to in-house and offsite teams in accordance to set production schedule
- Suggested recommendations for pattern improvements upon evaluation of garment for quality and fit

TECHNICAL DESIGN COORDINATOR

Chico's FAS, Inc | Fort Myers, FL | October 2019 - April 2020

- Prepared for daily fittings for 5 different product categories: measured samples, evaluated garment fit and construction as it relates to the specific standard requirements
- Reviewed garment patterns in Optitex patternmaking software to suggest edits to vendors
- Assisted in the development of tech packs including entry of measurements, pictures, sketches, and additional relevant information into PLM system

TECHNICAL DESIGNER (CONTRACT)

Honeywell - First Responder Products | Dayton, OH | March 2019 - August 2019

- Provided sustaining technical design and patternmaking support to U.S. based garment manufacturing by modifying existing work instructions and tech packs
- Collaborated with manufacturing teams to establish and document best practices
- Made appropriate recommendations in collaboration with peer teams on matters pertaining to specifications, patterns, construction methods, and techniques to improve overall quality of the garment

EDUCATION

North Carolina State University | May 2018
B.S. Fashion & Textile Design with International Studies Minor

London College of Fashion | Spring 2017
Study Abroad Course - Fashion Product Design
